## 3. Services Area:

As a software development service provider, WEBEE TECHNOLOGY strives to provide quality application development services and web development services that help to remain in step with our competitors. For this, we use modern software development platforms, and application development tools as well as employ the latest project management

techniques and software engineering practices. Using structured methodologies and proven IT processes helps to reduce complexity, risks and cost efficiency, We help our customers to develop custom software applications and assist them throughout the entire software development Life Cycle, including project management, systems analysis and design, development, implementation, training and application maintenance. In a nutshell, our strong technical team can help ensure that the software development services we provide fit your business needs and meet your expectations.

Our software development services include:

Modern business is completely Internet-driven and stiff online competition makes it mandatory for every business to devise its strategy. Offshore application development brings the much-needed vibrancy to your business so that you can enjoy a competitive edge and push up your ROI graph.

### 3.1. Software Development Services at WEBEE TECHNOLOGY

WEBEE TECHNOLOGY is strongly focused on creating customer-oriented software applications. The development team minutely examines and analyses the existing IT processes of the clients. It does the gap analysis to ensure complete compatibility between the existing systems and custom-developed applications. The supplications are designed, tested and deployed to the complete satisfaction of the clients.

We have expertise in the following:

- Custom application/software development
- Application/Software re-engineering
- E-commerce application development
- Website & Web Apps development
- Customized CRM and CMS development
- Application extension and up-gradation to make it more scalable for future business needs
- Custom web-based application development using technologies like PHP, Laravel, WordPress, Shopify, Vue.js, Next.js, React.js etc.
- Client-Server Application Development

Technology Expertise:

We use the following tools and technologies to provide above mentioned custom application services:

- Open source: PHP, MySQL, Linux and Apache
- Others: Oracle and Android programming

### Benefits of Software Application Development:

The business organizations need to spruce up their workflow/ IT processes so that they can deliver more customer-centric products/services to their clients. This adds value to their business and ensures a thumping web presence. Custom software development services have their own benefits, which are mentioned below:

- ▾ They allow businesses to innovate so that the targeted user group is best served.
- ▾ Replaces the expensive and inefficient IT processes, with custom-made software applications for better business results.
- ▾ Streamlines business practices and reduces overheads.
- ▾ Helps businesses to embrace the latest technology and practices so that the working process becomes highly market-oriented.

### Our Advantages:

WEBEE TECHNOLOGY offers its client outsourcing benefits that drastically reduce the costs of custom application development. The clients stand to gain from their business association with WEBEE TECHNOLOGY for the following reasons:

- ▾ State-of-the-art ODC that provides custom applications at very competitive pricing.
- ▾ Flexible hiring options that suit the project and budget needs of the clients.
- ▾ Increased clients in software application development for better results.
- ▾ Round-the-clock application maintenance services.
- ▾ Provides the latest technology so that clients gain or retain a competitive edge for a long time.

WEBEE TECHNOLOGY provides cutting-edge custom application development in India through its offshore development centre so that its global clientele can reap the benefits of robust, scalable, cost-effective and customized software applications.

## 3.2 Application Maintenance Services at WEBEE TECHNOLOGY

Application maintenance is the most critical part of any business. As needs for business change constantly, application deployed to manage business also needs to accommodate business changes as well and additional features are required to be developed. Over time, we have developed a process which understands the importance of critical business applications, thus WEBEE TECHNOLOGY assists you not only in customized application

development but also in maintaining them which ensures smooth operations and reduces the cost of redeveloping and redeploying applications.

Some of the industries we offer our Application Maintenance Services are:

- Hospital Management Software & Solutions
  - Warehouse Management Software & Solutions
  - Supply-Chain Management Software & Solutions
  - Hotel Booking Management Software & Solutions
  - Customized Web Application Development
  - Mobile Apps Development

### 3.3 Website Development Services at WEBEE TECHNOLOGY

We are a very experienced *website Development Company* providing high quality and cost-effective web development services using latest technologies - ASP.net, PHP, and Silverlight. Our web development services are tailored specifically to meet client requirements and the business objectives of customers. We have experience in delivering high-performance web applications with complex functionalities and have achieved commercial success.

Our web development services enable organizations to reduce time to market, get closer to customers and achieve long-term, profitable growth. We can help you to become web-connected by providing solutions like

- Internet strategy development
- Web enable-meant of legacy applications e-Business development / e-commerce development/Website design and development
- Internet and Intranet solutions
- Portal solutions, Community site development
- Specialized custom applications for Supply chain management, Network management, Business process management etc.

Over time, our applications have provided client benefits:

- Improving business process efficiency
- Increased growth in terms of top line as well as bottom line
- Use of legacy applications over the internet
- Monitoring and improving workforce productivity
- Better client relationships and lower client support

### 3.4 Software Migration Services at WEBEE TECHNOLOGY

Our Software Application Migration services help retain the know-how in your legacy applications and at the same time leverage on the performance potential of latest technologies. Whether the development toolset is on the desktop or on the Internet, WEBEE TECHNOLOGY is capable of developing and implementing software application migration/application porting projects. We perform migration/re-engineering of applications from existing platforms to newer ones and from older legacy technologies to newer open technologies.

Migration methodology can include

- Integrates Legacy Systems and new Internet-driven technologies.
- Migration of systems and business logic to new architectures, languages and web-based environments.
- Ensures systems quality and stability.
- Replace a legacy system, moving the data from the legacy application to the new application while preserving data integrity.
- Consolidate legacy systems eliminating duplication by moving data and functionality from various systems to a smaller number of systems.

WEBEE TECHNOLOGY, a custom software development company has web-enabled a lot of the legacy OLTP (An OLTP system is an application that modifies data and has a large number of concurrent users. Many OLTP systems are written against a DBMS) applications like replacing the middleware by Windows

compliant application server and redesign the user interface with OO (.Net Apps), making the application accessible for enterprise application integration and e-business.

We work on every phase of the migration process i.e. current technology study and evaluation, requirement analysis, code migration, testing phase as well and deployment phase.

## 4. Our Mission, Vision & Value

### 4.1 Mission

To lead in the various avenues of the Software Outsourcing market, implement novel ideas in project development and deliver cost-effective and required solutions to its prospective clients.

- Partnering with various clients helps in bringing fresh ideas into the firm ensuring our youth in innovation, thus improving our quality standards accompanied by growth in business productivity.
- Being a trustworthy and fair business partner.
- Maintaining and upgrading the quality of work and motivating people to constantly deliver work to the client's satisfaction.

### 4.2 Vision

To earn global admiration as an IT, by building and maintaining a long-lasting relationship with people and technology and delivering functional software and excellent services.

We believe nothing works like networking. We ensure an excellent relationship with our internal and external teams; our employees and our clients. At WEBEE TECHNOLOGY, team building and close interaction transcend our potential to assist and improve our business productivity and growth. We take Customer and client satisfaction as an opportunity to express leadership and deliver valuable services. Through the expression of transparency and commitment towards our work team and work, we have successfully been able to create an excellent environment within and across the company.

### 4.3 Value

We cherish and nurture our values and interactions with all our employees and clients. We have high regard for individual value which creates a transparent atmosphere ensuring outstanding teamwork and rapport, built within the company. We promise to live up to our values.

Our values are reflected in

- Bonding relationships with clients
- Client Intimacy

- Confidentiality with respect to work
- Reflective atmosphere
- Integrity expressed
- Independent business objectives

## 5. Our Specification

*We Are Unique* because of our three central part ideas that help us to stand out from other software or web development companies.

The first of these is a commitment to provide complete solutions. Throughout the process of software or web development, we focus on user issues, business issues, and design issues. Together these three areas make up the essential components of any software or web application. This approach enables us to provide not only quality software or web products but also a complete software or web solution.

The second of these is an idea of the importance of partnership. WEBEE TECHNOLOGY has often worked in partnership with other companies to develop software or web solutions, and we believe our clients should be our partners too. In this way, our expertise is combined with the strengths and specialist skills of others.

The three of these are updating system software or the web. We completed the update of our client system in a short time which the client required with appropriate costing. We don't demand an unexpected cost for system updating or changing any module or part of our system. Always we try to keep updating our clients and we don't demand any cost for updating which is completely of our own conscience.

*We Ensure*

- Complete all requirements in a short time which is required.
- Timely Budget Deliveries
- Shortened Lead Times for Project Start-Up
- Significant Cost Advantage
- Leverage Strong Project Management Expertise
- Leverage Highest Quality Standards
- Access To Diversified Pool of Skilled Professionals
- Shortened Development Cycles
- Response by short time on call if any problem occurred.
